

GLACIÄR MIDI

Fixed Sensor Element Replacement

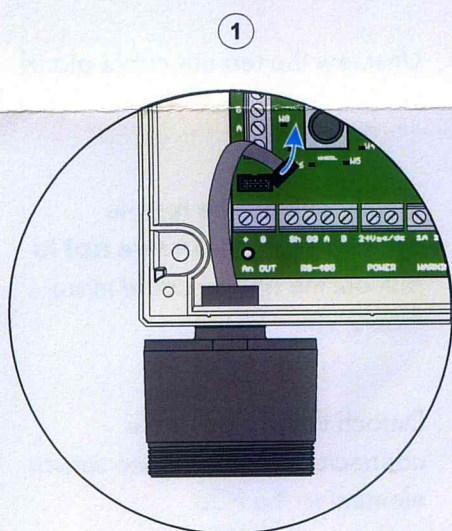

The following steps shall be taken when replacing the fixed sensor element:

1. Power off the unit
2. Remove the lid from the detector
3. Perform the sensor element replacement procedure described in below (1-3).
4. Make sure that the sensor element and cable glands are tightened.
5. Mount the lid
6. Power on the unit
7. Control the sensor element function with the SAMON GLACIÄR app.

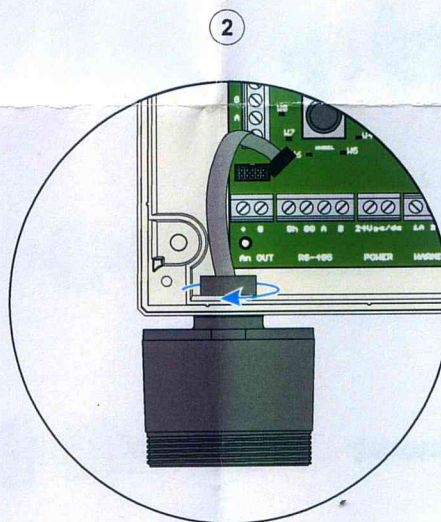

(The connected app should show the gas concentration - not greyed out)

For more details download the full manual and the app by scanning this QR code:

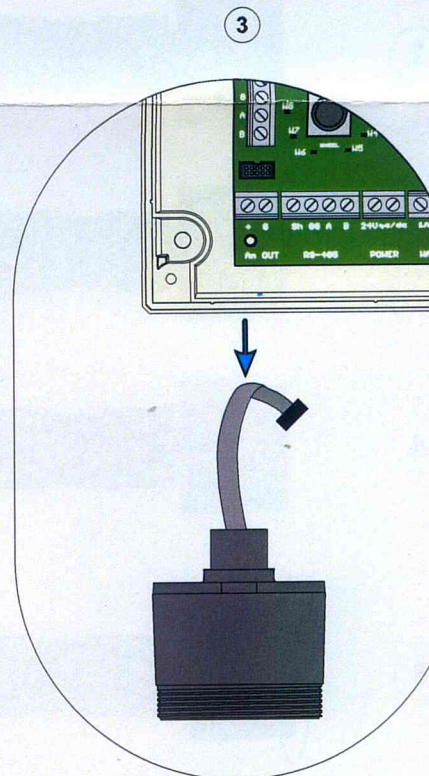

or visit: <https://samon.com/download-app/>

Detach the ribbon cable connector connecting the sensor element to the main PCB.

Unscrew the sensor element from the detector's enclosure.

Pull out the sensor element from the detector's enclosure.

Mount the new sensor element in reverse order.

For remote sensor element replacement - turn sheet →
