

Hoses

Kobra™ High Pressure Hose

made in the USA

Made from Kevlar®, Kobra™ Hoses are flexible and strong

JB uses a common crimp that grips the full circumference of the hose yielding a maximum hold and a uniform seal that prevents leaks and bursts.

All fittings feature safety grooves to prevent back spray.

With a pressure rating of 800 psi working, 4000 burst, these hoses can be used with ALL common refrigerants except ammonia.

Nitrile cover is more resistant to oil so your hoses last longer.

Fast. Fierce. Flexible. Kobra™ hoses

JB introduces the Kobra™ series of refrigerant hoses. Made from Kevlar®, the same material that stops bullets in bullet-proof vests, these series of hoses are incredibly strong. With a pressure rating of 800 psi working and a 4000 psi burst rating, these hoses can be used with ALL common refrigerants except ammonia. Kobra™ hoses feature a nitrile cover which is better than neoprene because it is more resistant to oil giving the hoses a longer life.
